# CUSTOMIZED TRAINING CONTENT AND DELIVERY – 3D MODEL

1

Discover (Skillset Gaps | Business Needs)

2

Deliver (Virtual Live | Classroom Training)

3

Determine (Follow-up | Review to Implement)

# 1. DISCOVER

---

Here, we meet with the responsible stakeholders to understand their business direction in the next 2-5 years, and skillset gaps in their team.

We also meet with the employees (optional) to understand from them what they need help with. While meeting them, we also make our own notes on what else we should do for them.

## 2. DELIVER

---

Based on the notes, we curate a deeply customised (bespoke) content where the team gets everything they need and almost nothing that they don't.

With this deeply customised content, we conduct virtual live or classroom training which is very practical with real life examples, facts & figures, relevant interview videos and role plays to ensure the team is ready for implementation.

We take a list of new learnings from the team that they will be implementing in short, mid and long term. This list is shared with the management team and kept with us also for follow up and review.

## 3. DETERMINE

---

We follow-up and review after 1-3 months to determine implementation.

We also offer creative solutions to the problems that the team is facing.

In some cases, we create a group chat to offer creative solutions real time when they hit a roadblock.

# THANK YOU
